50X1-HUM

1. Gasoline and oil supplies for the Yugoslav Army are kept in tanks, some of which are built underground. Fuel is also kept in barrels which are maintained in stores (for the most part underground or in the side of cliffs or hills). The fuel tanks are made of reinforced concrete, and are surrounded by walls which are covered by concrete convex roofs. All stores and tanks are very well camouflaged, and are difficult to locate from the air.

4. The following information is available regarding tanks at the following places:

- a. Valjevo - Four tanks of 4,000 tons capacity - built as stated above. They are situated close to the airfield and supply the field, the motor vehicles of the garrison and the Vistad factory.
- b. Jamniska Stena - Located in a gorge between Cacak and Uzicka Pozega. The tanks are built in the gorge which provides excellent protection from air attack. The tanks are on the right side of the railroad station at a distance of about 500 meters. A railroad line runs to the tanks, which also supplies the Uzicka Pozega airfield. The airfield is connected to the tanks by a pipe-line.
